

After 127

Death of Juvenal

127-141 A.D

Ptolemy evolves a theory of the universe with earth as a sphere making the most significant contribution to oceanography until the Age of Exploration

AD 127 to 151

---

Claudius Ptolemy made observations  
at Alexandria from 127 to 151  
Almagest

He measured the moon's distance  
from the earth by the parallax method  
Ptolemy was the first to use the  
terms parallels and meridian  
in geography

AD 127

PTOLEMY of Alexandria prepared a star catalog of 1,022 stars listing their brightness and position
